What is 3-dimensional art?
... now, how would you describe 3D art?
3-DIMENSIONAL ART

• is part of the environment
• has weight, height, depth
• has form and shape
• can be seen from at least 3 sides at once
• isn’t flat
• sticks out – you have to move yourself around it to see most or all of it.
• can cast a shadow
Can you think of any other ways to describe 3D art?
